General Product Specifications

Shutters without bottom support

Sussex shutters will be covered by our warranty for this application, subject to our standard spec limitations and the guidelines listed below:

Single panel configurations:

- ◇ In situations where shutters will not have bottom support, customers must inform Limb Corporation when initially placing the order, or warranty will be considered void.
- ◇ Informing Norman Shutters when placing the orders ensures that the factory will add extra hinges to support the panel. This will reduce the probability of the panels sagging.
- ◇ If customers fail to notify Limb Corporation that the shutter will be used without a bottom support or used as doors, this will constitute a misapplication of the shutter, and consequently, customers will be responsible for the cost of the any RGA Reorder that is submitted.
- ◇ If customers want a bifold, a track must be ordered to support the panels.
